

# ANIRUDH VELLANKI

Agentic AI Developer | Python Full Stack Developer

vellankianirudh2001@gmail.com • Hyderabad, India • [github.com/anirudh-agentic](https://github.com/anirudh-agentic) • [linkedin.com/in/anirudh-v-84711b315](https://linkedin.com/in/anirudh-v-84711b315)

## PROFESSIONAL SUMMARY

Python Full Stack Developer and Agentic AI Developer with 1.5+ years of experience building production-ready LLM applications, intelligent automation systems, and full-stack web applications. Skilled in designing multi-agent workflows using LangChain and LangGraph, working with SQL databases (PostgreSQL, MySQL), and delivering scalable backend APIs and modern frontend interfaces — from database design through production deployment.

## CORE SKILLS

|                       |                                                                                             |
|-----------------------|---------------------------------------------------------------------------------------------|
| AI & LLMs:            | OpenAI API, LangChain, LangGraph, Multi-Agent Systems, Prompt Engineering, Vector Databases |
| Backend Development:  | Python, FastAPI, Django                                                                     |
| Frontend Development: | Next.js, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS                                  |
| Databases:            | PostgreSQL, MySQL, SQLite                                                                   |
| API Integrations:     | Slack API, Freshworks CRM API, Google Sheets API                                            |

## PROFESSIONAL EXPERIENCE

### Agentic AI Developer | Full Stack Python Developer

Digital Edify Technologies Pvt Ltd – Hyderabad, India • Jan 2026 – Present

- Architected and deployed multi-agent AI systems using Python, OpenAI APIs, and LangChain to automate CRM workflows and behavioral analytics.
- Built high-performance backend systems with FastAPI & Django REST, designing optimized SQL queries, indexing, and schema models for large-scale data processing.
- Delivered end-to-end automation pipelines integrated with Slack, Freshworks, and Google Sheets, reducing manual operations and improving reporting efficiency.

### Full Stack Python Developer

Digital Edify Technologies Pvt Ltd – Hyderabad, India • Nov 2024 – Dec 2025

- Developed 3+ production-grade full-stack applications using Python, Django, React, and Next.js with scalable architecture.
- Designed and optimized relational databases (PostgreSQL/MySQL) with complex SQL queries, joins, and indexing to improve performance and reduce response time.
- Built and integrated REST APIs and third-party services (Razorpay, Nodemailer) for enterprise HRMS automation.

### Full Stack Python Developer – Intern

Skill Capital – Hyderabad, India • Mar 2024 – Sep 2024

- Developed backend modules and REST APIs using Django for real-world applications.
- Wrote efficient SQL queries and handled database operations (MySQL/SQLite) for CRUD and data management.
- Built responsive frontend interfaces using HTML, CSS, and JavaScript.

## KEY PROJECTS

### Freshworks CRM Automation & Agentic AI Audit System

[Python](#) · [OpenAI API](#) · [LangChain](#) · [LangGraph](#) · [Freshworks API](#) · [Google Sheets API](#) · [Vector Embeddings](#)

- Built an autonomous multi-agent AI pipeline that monitors daily CRM lead activity, detects mutations in ratings and notes using a custom diff engine, and auto-generates AI-powered manager insights — delivered directly into formatted Google Sheets reports.
- Tech: LangChain agents orchestrate Freshworks API ingestion → LLM analysis → structured reporting with rate limiting and secure .env credential management.
- Impact: Eliminated 100% of manual CRM audit work for the entire sales team, running 24/7 with zero human intervention.

### Slack Hourly Report Bot — Intelligent Automation Agent

[Python](#) · [FastAPI](#) · [Slack API](#) · [Google Sheets API](#) · [CSV Hot-Reload](#)

- Built an autonomous Slack bot that sends hourly team check-ins, captures responses via Slack event handling, and persists structured data to individual Google Sheets tabs per team member.
- Tech: Event-driven architecture with intelligent non-response detection, automated follow-up triggers, and CSV-based team hot-reload — no code changes needed to onboard new users.
- Impact: Replaced manual daily standups entirely, ensuring 100% data capture across distributed teams with zero manual intervention.

### HRMS — Human Resource Management System

[Next.js](#) · [React](#) · [TypeScript](#) · [Tailwind CSS](#) · [PostgreSQL](#) · [Razorpay](#) · [Nodemailer](#)

- Built a full-stack HRMS covering the complete employee lifecycle — onboarding, attendance tracking, leave management, payroll, and offboarding — served to real enterprise clients.
- Tech: Next.js API routes, PostgreSQL schema design, Redux state management, Razorpay payment gateway for payroll, and Nodemailer for automated HR workflow notifications.
- Impact: Delivered production-ready system handling live client workloads, reducing HR admin overhead through end-to-end automation.

## EDUCATION

### Bachelor of Technology

SR International Institute of Technology • 2023
